

ASSEMBLY KIT FOR POLYWALL BLS - NLS

KIT WALL

DESCRIPTION

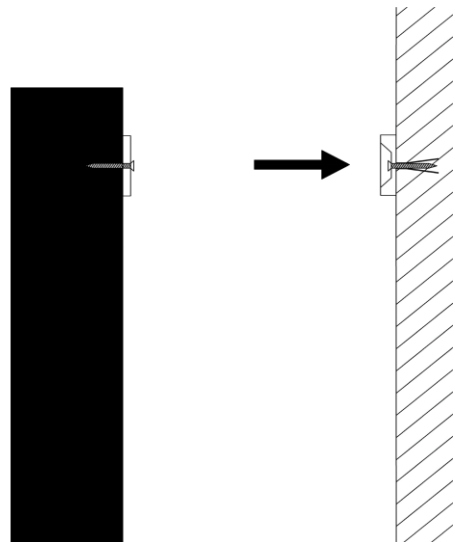

White or black polyester fiber panel with provision for wall fixing by means of three hole-saving stainless steel rings on which to insert the mechanical fasteners installed on the wall (not included).

KIT MAGNETIC

DESCRIPTION

Panel in white or black polyester fiber with predisposition for traction fixing by means of steel washers positioned on the panel and 4 magnets installed on the wall by means of mechanical fixings (not included).

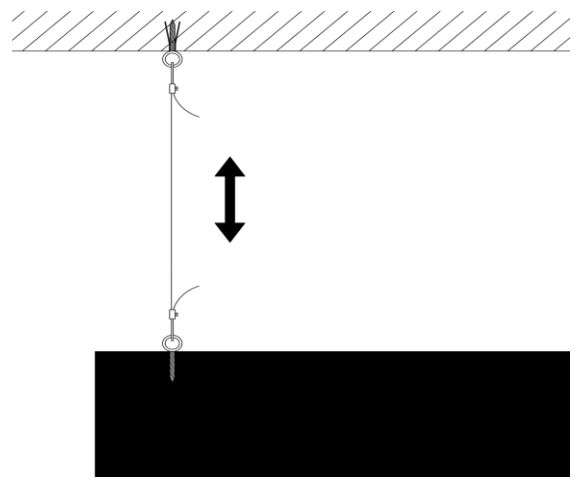

KIT CEILING

DESCRIPTION

Panel in white or black polyester fiber with provision for fixing spaced from the intrados by means of screw eyelets positioned on the face of the panel and 4 steel cables 1.50 meters long each.

The cables are fixed to the eyelet on the panel and to a further eyelet (not included) by means of mechanical locking clamps.

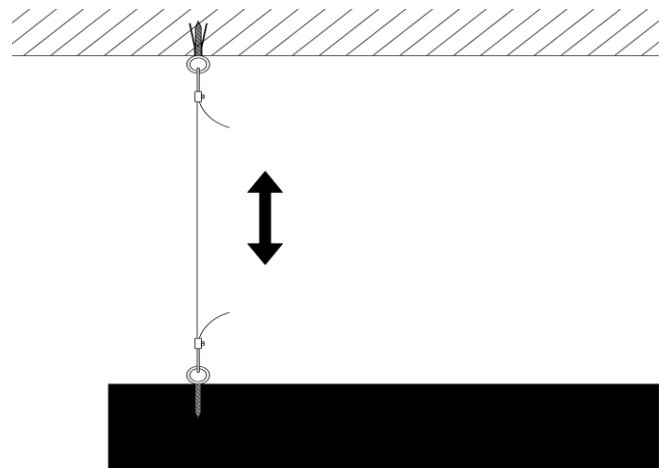

KIT BAFFLES

DESCRIPTION

Panel in white or black polyester fiber with provision for fixing spaced from the intrados by means of screw eyelets positioned on the thickness of the long side and 2 steel cables 1.50 meters long each.

The cables are fixed to the eyelet on the panel and to a further eyelet (not included) by means of mechanical locking clamps.

KIT FIXING

DESCRIPTION

Kit comprising 4 two-component nylon plugs for 5 mm holes with relative 4x30 metal screws.
